

INDUSTRIAL SPECIFICATION GRADE LOCKING PLUGS & CONNECTORS

- Leviton combines the best materials available with superior production standards to produce a broad selection of Locking Devices of unmatched flexibility and dependability.
- Uncompromising industrial-grade quality for superior performance and long service life
 - All industrial locking devices feature heavy-duty, impact-resistant construction
 - Plugs and connectors accept wide range of conductors
 - Terminals clearly identified on all devices to speed and simplify wiring
 - Backed by a limited 10-year warranty
 - Certified for sale in Canada by an accredited certification body

COMMERCIAL GRADE STRAIGHT BLADE PLUGS

Commercial Specification Grade Straight Blade Plugs and Connectors are rugged performers. They are moisture, chemical and abuse-resistant. And they're ideal for indoor and outdoor use. All of these features and benefits are common to 15 A and 20 A Commercial Specification Grade Plugs and Connectors. TPE rubber-backed plugs and connectors stand up to rough use and protect against dirt and moisture. Deep-slotted, backed-out terminal screws draw backwire clamps securely over stripped leads for maximum conductivity.

CORROSION RESISTANT DEVICES

- Corrosion resistant devices are specifically designed for extremely damp and corrosive environments. They offer additional corrosive resistance because the metal parts (blades, contacts, terminals and screws) are nickel-plated. They have also passed the ASTM (B117.13) 500 hour Salt Spray (Fog) Test.
- Cord clamp seats flush with body for all cable sizes from 10-3 ST to 18-3 SVT (.245"-.700"), providing positive strain relief while preventing damage to cable jacket
 - Captive, brass #8 terminal screws are colour coded for easy wiring identification: green (ground), brass (hot) and silver (neutral)
